## WAYS AI IS CHANGING ACCOUNTS PAYABLE AUTOMATION

Cognitive data capture is changing the OCR market.

Deep learning is the groundbreaking new technology that adapts to all layouts and overcomes legacy OCR issues.

### 1 TIME SAVINGS

With AI, the time to automate accounts payable processes can be greatly reduced.

### 2 ACCURACY

Automation allows for efficiency on par with humans, but unparalleled in accuracy.

### 3 PRODUCTIVITY

As business processes are automated, there will be less tedious, manual work that employees will need to focus on.

### 4 COST REDUCTION

Time management, accuracy and productivity all work together towards increasing your bottom line.

Rossum is the AI company working to automate business processes by eliminating manual data entry.
