Rossum + Coupa

Rossum is an official Coupa Partner

We are proud to partner with Coupa and enable end-to-end touchless invoice processing. Additionally, we have developed an enterprise-grade Coupa-certified integration that allows you the autonomy to adapt Rossum to your business rules and workflows.

Who has time for templates?

Coupa's customers need a solution that automatically ingests invoices in varying file formats and layouts without the need for templates, and integrates with Coupa so that it can process all your invoices into the downstream accounting system for a seamless flow of validated data.

Rossum is the answer. Our AI-first platform deploys Rossum Aurora, our next-generation AI, to automate end-to-end transactional document processing. **Layout and language agnostic**, Rossum is powered by our proprietary LLM trained on millions of transactional documents, to quickly understand invoices without needing templates. **Extract, sort, validate, and transport any document, from PDFs to paper, into Coupa.** Rossum is a cloud-native solution with a highly customizable architecture to enable hassle-free integration with Coupa.

Coupa-certified integration

Say goodbye to manually typing data from one system to another with trustworthy automation. Rossum deploys cutting-edge AI that flags when confidence is too low ensuring **that only highly accurate invoice data is sent to Coupa.** For us, end-to-end also includes Gen-AI powered email to automate exception handling without having to leave the platform. Rossum's Coupa integration extracts and instantly sends validated PO and Non-PO invoice data with associated documents from Rossum to Coupa, as well as the synchronization of master data from Coupa to Rossum.

The benefits are straightforward: **increased accuracy and cost savings, faster document processing, and better data control.** Rossum is an enterprise-grade platform that has customizability built-in and a raft of extensions, giving you the autonomy to adapt Rossum around your business rules, systems and workflows. Rossum is easy to set up, can process high volumes of transactional documents in various file formats and layouts, and gets visibly smarter over time as it learns. Together, Rossum and Coupa deliver efficient, automated financial workflows.

Document ingestion
Emails | Scan | EDI

Rossum Aurora

Pre-Process & Sort
Remove Spam
Split documents
Duplicate rejection
Classify & route

Extract & Match
AI data extraction
PO matching
Business rules
Suspicious similarities

Communicate & Collaborate
Vendor notification
Accept / Reject
Approval workflows

Straight Through Processing
No manual intervention

Human in the Loop
Easily identify & action exceptions

Supported file formats

Rossum ingests the following file formats: **PDF, PNG, JPEG, TIFF, XLSX, XLS, DOCX, DOC, XML, JSON, CSV.**

Rossum + Coupa

Save time and money

Our Coupa integration is built to improve efficiency and productivity by automating end-to-end invoice processing workflows and eliminating manual data entry into Coupa as well as your downstream accounting system.

Improved extraction capabilities

Rossum automatically ingests invoices via multiple input options from email, API, EDI to scans. The AI extracts invoice information with high accuracy which is validated against Coupa master data for better data control and touchless straight-through processing.

Seamless integration and stability

Rossum's certified Coupa integration is tested for bugs and security issues to deliver a hassle-free integration, reducing the cost and IT resources required for implementation. In addition, our 99.5% SLA uptime guarantee ensures stability and reduces the number of support tickets.

Leverage advanced AI

Rossum brings you Rossum Aurora, the most advanced AI powered by our proprietary LLM, which means it can quickly learn new languages and document types, while templates and rule-based extraction are consigned to the past.

Safe and secure

Coupa Certification means that our integration is continually supported to ensure compatibility with the latest Coupa versions. While our dedicated security, privacy and compliance teams ensure your data is protected. We follow security standards for integration with Coupa APIs and also undergo regular audits for SOC 2 and ISO 27001 certification compliance.

Customers with Coupa integrations

How do Rossum and Coupa work together?

Rossum performs invoice data extraction using trained AI which learns without the need for templates.

↓

Rossum automatically validates the extracted data by matching it with any master data out-of-the-box. For example:

• vendor data
• purchase order data

↓

Rossum transforms the output data format to the desired format for Coupa integration.

↓

Rossum instantly pushes the extracted and validated real-time data along with a PDF of the original invoice to Coupa.

↓

Rossum retrieves master data from Coupa's side on a scheduled basis.
