

# Free your AP team from invoice chaos

Rossum's AI agents work seamlessly with Coupa to handle the paperwork before invoices even reach your system - reading emails, PDFs, scans, or e-invoices; coding, matching, resolving exceptions, and more.

## Extend Coupa's power to every invoice

Invoices come in all shapes and formats, and through various channels - Rossum is here to handle them all, adapt to your unique business rules, and ensure that Coupa always receives clean, complete data.

- Understands any invoice format or layout in **276 languages**.
- **No templates needed** - Rossum learns from every user interaction.
- Extracts even the **most complex line items** with ease.
- Captures your custom, **business-specific data points** automatically.

## Get ready for e-invoicing mandates with a PEPPOL-ready solution

## Automate the most complex AP tasks

Rossum smoothly integrates with Coupa to fully automate even the most complex accounts payable processes - from coding and automating non-PO transactions to matching invoice data across Coupa objects. It also identifies early payment discounts, detecting duplicate invoices across multiple sources, and more.

Non-PO invoices

GL & tax coding

Multi-line PO matching

2/3/4 way matching

Discount detection

Supplier communication

Discrepancy resolution

Duplicate detection

Trusted by the most innovative AP and finance teams around the world

# Supercharge your Coupa investment with Rossum

Extend Coupa's automation capabilities to include messy, multi-format invoices coming through various channels - unlocking new efficiencies across your AP team.

“

*The integration of Rossum with Coupa has streamlined workflows, significantly reducing the amount of low-value manual work carried out by the AP team and speeding up invoice processing as a result.*

Anne Thomas  
VP of Finance Systems

## Built for Coupa, engineered for the enterprise

Rossum is a certified Coupa App, purpose-built to meet the demands and security requirements of global enterprises. Designed to reduce IT workload, accelerate time to value, and support the Global Business Services model, it is trusted by leading organizations worldwide.
